MD ARIF ALI

BACKEND / FULL-STACK ENGINEER | APPLIED AI

India | Open to remote and relocation | dev.arifali@gmail.com | linkedin.com/in/arifali2904 | github.com/Er-Arif | arifali.me

PROFESSIONAL SUMMARY

Backend and full-stack software engineer building secure, production-oriented applications with Python, TypeScript, FastAPI, React/Next.js, PostgreSQL, Docker, and applied AI workflows. Hands-on project experience spans mobile/web products, APIs, authentication, payments, background jobs, testing, deployment hardening, and LangGraph-based LLM orchestration.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java

Frontend: React, React Native, Next.js, Redux Toolkit, Tailwind CSS

Backend: FastAPI, Node.js, Express, REST APIs, SQLAlchemy, Prisma, JWT/RBAC

Data & Infrastructure: PostgreSQL, Redis, MySQL, SQLite, Docker, GitHub Actions, Alembic, Celery, MinIO

Applied AI: LangGraph, Groq, LLM APIs, tool orchestration, structured outputs, retry/fallback handling

Engineering: API design, authentication, payments, testing, CI/CD fundamentals, observability, debugging

SELECTED PROJECTS

ClinicFlow - Clinic Practice Management Platform | *React Native, TypeScript, FastAPI, SQLAlchemy, PostgreSQL, Docker*

- Built an Android-first clinic operations platform covering patients, scheduling, appointments, payments, receipts, follow-ups, reminders, reporting, settings, and audit workflows.
- Implemented RBAC, Argon2id authentication, rotating sessions, idempotent state-changing operations, PostgreSQL concurrency guards, financial correction history, and production secret validation.
- Hardened CI, migrations, backup/restore verification, structured logging, mobile failure recovery, staging/UAT workflows, and release-readiness checks.

Software Distribution & Licensing Platform | *Next.js, TypeScript, FastAPI, PostgreSQL, Redis, Celery, MinIO*

- Built a production-oriented platform for software sales, customer entitlements, license activation, device management, signed updates, downloads, billing, and admin operations.
- Integrated Razorpay and PayPal payment flows, strict webhook verification, signed license responses, feature policies, background jobs, audit logs, and release rollback workflows.
- Added API/browser QA, automated backend tests, Docker orchestration, Alembic migrations, and deployment/backup documentation.

AI-First CRM - HCP Interaction Copilot | *React, Redux Toolkit, FastAPI, LangGraph, Groq, PostgreSQL*

- Built an AI-controlled CRM workflow where natural-language requests are classified, validated, persisted, and reflected back into canonical application state.
- Orchestrated five LangGraph tools for logging, editing, summarizing, history lookup, and next-action recommendations with structured outputs and confidence-aware responses.
- Added retry/fallback handling for LLM failures, server-side normalization, structured AI logs, database persistence, and backend regression tests.

OTP Authentication Service | *Node.js, Express, Prisma, PostgreSQL, Zod, Docker*

- Built reusable multi-app OTP authentication with hashed OTPs and refresh tokens, provider abstraction, audit logging, health checks, cleanup worker, tests, and GitHub Actions CI.

EDUCATION

Undergraduate studies in Computer Science & Engineering, Chandigarh University | 2020-2024

CERTIFICATIONS

TypeScript Essentials - Infosys Springboard | Machine Learning - Coursera | Natural Language Processing - Internshala | Introduction to Computer Vision - Coursera
